Account

Business that represents a customer or potential customer. The company that is billed in business transactions.

Setting	Value
Collection Name	Accounts
Logical Name	account
Primary attribute name	accountid
Object Type Code	1
Is custom table	No

Attributes

Display Name	Logical Name	Datatype	Description
Email Address 3	emailaddress3	String	Type an alternate email address for the account.
Email Address 2	emailaddress2	String	Type the secondary email address for the account.
Email	emailaddress1	String	Type the primary email address for the account.
Address 1: City	address1_city	String	Type the city for the primary address.
Address 1: Street 1	address1_line1	String	Type the first line of the primary address.
Created By (IP Address)	adx_createdbyipaddress	String	
Modified On	modifiedon	DateTime	Shows the date and time when the record was last updated. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
Aging 90	aging90	Money	For system use only.
Record Created On	overriddencreatedon	DateTime	Date and time that the record was migrated.
Website	websiteurl	String	Type the account's website URL to get quick details about the company profile.
Address 1: Longitude	address1_longitude	Double	Type the longitude value for the primary address for use in mapping and other applications.
Open Revenue	openrevenue	Money	Sum of open revenue against an account and its child accounts.
Address 1: Address Type	address1_addresstypecode	Picklist	Select the primary address type.
Shares Outstanding	sharesoutstanding	Integer	Type the number of shares available to the public for the account. This number is used as an indicator in financial performance analysis.
Modified By (User Name)	adx_modifiedbyusername	String	

Display Name	Logical Name	Datatype	Description
Send Marketing Materials	donotsendmm	Boolean	Select whether the account accepts marketing materials, such as brochures or catalogs.
Credit Hold	creditonhold	Boolean	Select whether the credit for the account is on hold. This is a useful reference while addressing the invoice and accounting issues with the customer.
Aging 30	aging30	Money	For system use only.
Do not allow Bulk Mails	donotbulkpostalmail	Boolean	Select whether the account allows bulk postal mail sent through marketing campaigns or quick campaigns. If Do Not Allow is selected, the account can be added to marketing lists, but will be excluded from the postal mail.
Created By (Delegate)	createdonbehalfby	Lookup	Shows who created the record on behalf of another user.
Main Phone	telephone1	String	Type the main phone number for this account.
UTC Conversion Time Zone Code	utcconversiontimezonecode	Integer	Time zone code that was in use when the record was created.
Address 1: Shipping Method	address1_shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Open Deals (Last Updated On)	opendeals_date	DateTime	Last Updated time of rollup field Open Deals.
Originating Lead	originatingleadid	Lookup	Shows the lead that the account was created from if the account was created by converting a lead in Microsoft Dynamics 365. This is used to relate the account to data on the originating lead for use in reporting and analytics.
Category	accountcategorycode	Picklist	Select a category to indicate whether the customer account is standard or preferred.
Address 2: State/Province	address2_stateorprovince	String	Type the state or province of the secondary address.
Managing Partner	msa_managingpartnerid	Lookup	Unique identifier for Account associated with Account.
Address 2: Country/Region	address2_country	String	Type the country or region for the secondary address.
Address 2: Street 2	address2_line2	String	Type the second line of the secondary address.
Aging 60 (Base)	aging60_base	Money	The base currency equivalent of the aging 60 field.
SLA	slaid	Lookup	Choose the service level agreement (SLA) that you want to apply to the Account record.
Address 1: Street 3	address1_line3	String	Type the third line of the primary address.
Account Name	name	String	Type the company or business name.

Display Name	Logical Name	Datatype	Description
On Hold Time (Minutes)	onholdtime	Integer	Shows how long, in minutes, that the record was on hold.
Status	statecode	State	Shows whether the account is active or inactive. Inactive accounts are read-only and can't be edited unless they are reactivated.
Address 1: Freight Terms	address1_freighttermscode	Picklist	Select the freight terms for the primary address to make sure shipping orders are processed correctly.
Credit Limit	creditlimit	Money	Type the credit limit of the account. This is a useful reference when you address invoice and accounting issues with the customer.
Open Revenue (Base)	openrevenue_base	Money	Value of the Open Revenue in base currency.
Address 1: UTC Offset	address1_utcoffset	Integer	Select the time zone, or UTC offset, for this address so that other people can reference it when they contact someone at this address.
Parent Account	parentaccountid	Lookup	Choose the parent account associated with this account to show parent and child businesses in reporting and analytics.
Preferred Time	preferredappointmenttimecode	Picklist	Select the preferred time of day for service appointments.
Number of Employees	numberofemployees	Integer	Type the number of employees that work at the account for use in marketing segmentation and demographic analysis.
Classification	accountclassificationcode	Picklist	Select a classification code to indicate the potential value of the customer account based on the projected return on investment, cooperation level, sales cycle length or other criteria.
Credit Limit (Base)	creditlimit_base	Money	Shows the credit limit converted to the system's default base currency for reporting purposes.
Exchange Rate	exchangerate	Decimal	Shows the conversion rate of the record's currency. The exchange rate is used to convert all money fields in the record from the local currency to the system's default currency.
Address 2: County	address2_county	String	Type the county for the secondary address.
Primary Contact	primarycontactid	Lookup	Choose the primary contact for the account to provide quick access to contact details.
Telephone 3	telephone3	String	Type a third phone number for this account.

Display Name	Logical Name	Datatype	Description
Customer Size	customersizecode	Picklist	Select the size category or range of the account for segmentation and reporting purposes.
Address 2: City	address2_city	String	Type the city for the secondary address.
Status Reason	statuscode	Status	Select the account's status.
Address 2: Latitude	address2_latitude	Double	Type the latitude value for the secondary address for use in mapping and other applications.
Created On	createdon	DateTime	Shows the date and time when the record was created. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
Do not allow Bulk Emails	donotbulkemail	Boolean	Select whether the account allows bulk email sent through campaigns. If Do Not Allow is selected, the account can be added to marketing lists, but is excluded from email.
Do not allow Faxes	donotfax	Boolean	Select whether the account allows faxes. If Do Not Allow is selected, the account will be excluded from fax activities distributed in marketing campaigns.
Market Capitalization	marketcap	Money	Type the market capitalization of the account to identify the company's equity, used as an indicator in financial performance analysis.
Address 1	address1_composite	Memo	Shows the complete primary address.
Ownership	ownershipcode	Picklist	Select the account's ownership structure, such as public or private.
Open Deals (State)	opendeals_state	Integer	State of rollup field Open Deals.
Address 2: Freight Terms	address2_freighttermscode	Picklist	Select the freight terms for the secondary address to make sure shipping orders are processed correctly.
Do not allow Mails	donotpostalmail	Boolean	Select whether the account allows direct mail. If Do Not Allow is selected, the account will be excluded from letter activities distributed in marketing campaigns.
Address 2: ZIP/Postal Code	address2_postalcode	String	Type the ZIP Code or postal code for the secondary address.
Last Date Included in Campaign	lastusedincampaign	DateTime	Shows the date when the account was last included in a marketing campaign or quick campaign.
Process	processid	Uniqueidentifier	Shows the ID of the process.
TeamsFollowed	teamsfollowed	Integer	Number of users or conversations followed the record

Display Name	Logical Name	Datatype	Description
Address 2: Street 3	address2_line3	String	Type the third line of the secondary address.
Description	description	Memo	Type additional information to describe the account, such as an excerpt from the company's website.
Modified By	modifiedby	Lookup	Shows who last updated the record.
Time Zone Rule Version Number	timezoneruleversionnumber	Integer	For internal use only.
Address 1: County	address1_county	String	Type the county for the primary address.
Preferred Method of Contact	preferredcontactmethodcode	Picklist	Select the preferred method of contact.
Modified By (Delegate)	modifiedonbehalfby	Lookup	Shows who created the record on behalf of another user.
Do not allow Emails	donotemail	Boolean	Select whether the account allows direct email sent from Microsoft Dynamics 365.
Address 2: Post Office Box	address2_postofficebox	String	Type the post office box number of the secondary address.
Address 2: Telephone 1	address2_telephone1	String	Type the main phone number associated with the secondary address.
Address 2: Telephone 2	address2_telephone2	String	Type a second phone number associated with the secondary address.
Address 2: Telephone 3	address2_telephone3	String	Type a third phone number associated with the secondary address.
Created By (User Name)	adx_createdbyusername	String	
Address 1: ID (Deprecated)	address1_addressid	Uniqueidentifier	Unique identifier for address 1.
Traversed Path	traversedpath	String	For internal use only.
Yomi Account Name	yominame	String	Type the phonetic spelling of the company name, if specified in Japanese, to make sure the name is pronounced correctly in phone calls and other communications.
Owning User	owninguser	Lookup	Unique identifier of the user who owns the account.
Industry	industrycode	Picklist	Select the account's primary industry for use in marketing segmentation and demographic analysis.
Territory	territoryid	Lookup	Choose the sales region or territory for the account to make sure the account is assigned to the correct representative and for use in segmentation and analysis.
Address 2: Name	address2_name	String	Type a descriptive name for the secondary address, such as Corporate Headquarters.

Display Name	Logical Name	Datatype	Description
Open Revenue (State)	openrevenue_state	Integer	State of rollup field Open Revenue.
Primary Satori ID	primarysatoriid	String	Primary Satori ID for Account
Entity Image Id	entityimageid	Uniqueidentifier	For internal use only.
Aging 60	aging60	Money	For system use only.
Time Spent by me	timespentbymeonemailandmeetings	String	Total time spent for emails (read and write) and meetings by me in relation to account record.
Modified By (IP Address)	adx_modifiedbyipaddress	String	
Primary Twitter ID	primarytwitterid	String	Primary Twitter ID for Account
Default Image	entityimage	Virtual	Shows the default image for the record.
Created By (External Party)	createdbyexternalparty	Lookup	Shows the external party who created the record.
Address 2	address2_composite	Memo	Shows the complete secondary address.
Shipping Method	shippingmethodcode	Picklist	Select a shipping method for deliveries sent to the account's address to designate the preferred carrier or other delivery option.
Address 1: Country/Region	address1_country	String	Type the country or region for the primary address.
Payment Terms	paymenttermscode	Picklist	Select the payment terms to indicate when the customer needs to pay the total amount.
Owning Team	owningteam	Lookup	Unique identifier of the team who owns the account.
Owning Business Unit	owningbusinessunit	Lookup	Shows the business unit that the record owner belongs to.
Address 1: State/Province	address1_stateorprovince	String	Type the state or province of the primary address.
Marketing Only	marketingonly	Boolean	Whether is only for marketing
Last SLA applied	slainvokedid	Lookup	Last SLA that was applied to this case. This field is for internal use only.
Preferred Facility/Equipment	preferredequipmentid	Lookup	Choose the account's preferred service facility or equipment to make sure services are scheduled correctly for the customer.
Business Type	businesstypecode	Picklist	Select the legal designation or other business type of the account for contracts or reporting purposes.
Annual Revenue	revenue	Money	Type the annual revenue for the account, used as an indicator in financial performance analysis.
Currency	transactioncurrencyid	Lookup	Choose the local currency for the record to make sure budgets are reported in the correct currency.
Account Rating	accountratingcode	Picklist	Select a rating to indicate the value of the customer account.

Display Name	Logical Name	Datatype	Description
Address Phone	address1_telephone1	String	Type the main phone number associated with the primary address.
Address 1: Telephone 2	address1_telephone2	String	Type a second phone number associated with the primary address.
Address 1: Telephone 3	address1_telephone3	String	Type a third phone number associated with the primary address.
Address 1: Post Office Box	address1_postofficebox	String	Type the post office box number of the primary address.
Follow Email Activity	followemail	Boolean	Information about whether to allow following email activity like opens, attachment views and link clicks for emails sent to the account.
Fax	fax	String	Type the fax number for the account.
Master ID	masterid	Lookup	Shows the master account that the account was merged with.
SIC Code	sic	String	Type the Standard Industrial Classification (SIC) code that indicates the account's primary industry of business, for use in marketing segmentation and demographic analysis.
Owner	ownerid	Owner	Enter the user or team who is assigned to manage the record. This field is updated every time the record is assigned to a different user.
Address 2: UTC Offset	address2_utcoffset	Integer	Select the time zone, or UTC offset, for this address so that other people can reference it when they contact someone at this address.
Account Number	accountnumber	String	Type an ID number or code for the account to quickly search and identify the account in system views.
Address 2: Fax	address2_fax	String	Type the fax number associated with the secondary address.
Annual Revenue (Base)	revenue_base	Money	Shows the annual revenue converted to the system's default base currency. The calculations use the exchange rate specified in the Currencies area.
Merged	merged	Boolean	Shows whether the account has been merged with another account.
Address 2: Longitude	address2_longitude	Double	Type the longitude value for the secondary address for use in mapping and other applications.
Modified By (External Party)	modifiedbyexternalparty	Lookup	Shows the external party who modified the record.
Price List	defaultpricelevelid	Lookup	Choose the default price list associated with the account to make sure the correct product prices for this customer are applied in sales opportunities, quotes, and orders.

Display Name	Logical Name	Datatype	Description
FTP Site	ftpsiteurl	String	Type the URL for the account's FTP site to enable users to access data and share documents.
Aging 90 (Base)	aging90_base	Money	The base currency equivalent of the aging 90 field.
Do not allow Phone Calls	donotphone	Boolean	Select whether the account allows phone calls. If Do Not Allow is selected, the account will be excluded from phone call activities distributed in marketing campaigns.
Address 1: Primary Contact Name	address1_primarycontactname	String	Type the name of the main contact at the account's primary address.
Last On Hold Time	lastonholdtime	DateTime	Contains the date and time stamp of the last on hold time.
Address 1: Street 2	address1_line2	String	Type the second line of the primary address.
Created By	createdby	Lookup	Shows who created the record.
Address 2: Address Type	address2_addresstypecode	Picklist	Select the secondary address type.
Open Revenue (Last Updated On)	openrevenue_date	DateTime	Last Updated time of rollup field Open Revenue.
Market Capitalization (Base)	marketcap_base	Money	Shows the market capitalization converted to the system's default base currency.
Address 1: ZIP/Postal Code	address1_postalcode	String	Type the ZIP Code or postal code for the primary address.
Ticker Symbol	tickersymbol	String	Type the stock exchange symbol for the account to track financial performance of the company. You can click the code entered in this field to access the latest trading information from MSN Money.
(Deprecated) Process Stage	stageid	Uniqueidentifier	Shows the ID of the stage.
Address 2: UPS Zone	address2_upszone	String	Type the UPS zone of the secondary address to make sure shipping charges are calculated correctly and deliveries are made promptly, if shipped by UPS.
Participates in Workflow	participatesinworkflow	Boolean	For system use only. Legacy Microsoft Dynamics CRM 3.0 workflow data.
Stock Exchange	stockexchange	String	Type the stock exchange at which the account is listed to track their stock and financial performance of the company.
Preferred Service	preferredserviceid	Lookup	Choose the account's preferred service for reference when you schedule service activities.
Address 2: ID	address2_addressid	Uniqueidentifier	Unique identifier for address 2.

Display Name	Logical Name	Datatype	Description
Relationship Type	customertypecode	Picklist	Select the category that best describes the relationship between the account and your organization.
Import Sequence Number	importsequencenumber	Integer	Unique identifier of the data import or data migration that created this record.
Other Phone	telephone2	String	Type a second phone number for this account.
Version Number	versionnumber	BigInt	Version number of the account.
Account	accountid	Uniqueidentifier	Unique identifier of the account.
Preferred User	preferredsystemuserid	Lookup	Choose the preferred service representative for reference when you schedule service activities for the account.
Aging 30 (Base)	aging30_base	Money	The base currency equivalent of the aging 30 field.
Address 1: Name	address1_name	String	Type a descriptive name for the primary address, such as Corporate Headquarters.
Address 1: Fax	address1_fax	String	Type the fax number associated with the primary address.
Address 1: Latitude	address1_latitude	Double	Type the latitude value for the primary address for use in mapping and other applications.
Address 2: Shipping Method	address2_shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Preferred Day	preferredappointmentdaycode	Picklist	Select the preferred day of the week for service appointments.
Address 2: Street 1	address2_line1	String	Type the first line of the secondary address.
Address 1: UPS Zone	address1_upszone	String	Type the UPS zone of the primary address to make sure shipping charges are calculated correctly and deliveries are made promptly, if shipped by UPS.
Territory Code	territorycode	Picklist	Select a region or territory for the account for use in segmentation and analysis.
Address 2: Primary Contact Name	address2_primarycontactname	String	Type the name of the main contact at the account's secondary address.
Open Deals	opendeals	Integer	Number of open opportunities against an account and its child accounts.

Is custom table	No

Attributes

Display Name	Logical Name	Datatype	Description
Owning User	owninguser	Lookup	Unique identifier of the user who owns the note.
Owning Team	owningteam	Lookup	Unique identifier of the team who owns the note.
Regarding Object Type	objectidtypecode	EntityName	
Regarding	objectid	Lookup	Unique identifier of the object with which the note is associated.
Prefix	prefix	String	Prefix of the file pointer in blob storage.
File Pointer	filepointer	String	File pointer of the attachment.
Created By (Delegate)	createdonbehalfby	Lookup	Unique identifier of the delegate user who created the annotation.
Owning Business Unit	owningbusinessunit	Lookup	Unique identifier of the business unit that owns the note.
File Name	filename	String	File name of the note.
Import Sequence Number	importsequencenumber	Integer	Unique identifier of the data import or data migration that created this record.
Title	subject	String	Subject associated with the note.
Regarding	dummyregarding	String	Dummy attribute associated with the note regarding
File Size (Bytes)	filesize	Integer	File size of the note.
Version Number	versionnumber	BigInt	Version number of the note.
Modified By	modifiedby	Lookup	Unique identifier of the user who last modified the note.
Mime Type	mimetype	String	MIME type of the note's attachment.
Created By	createdby	Lookup	Unique identifier of the user who created the note.
Step Id	stepid	String	workflow step id associated with the note.
Storage Pointer	storagepointer	String	Storage pointer.
Description	notetext	Memo	Text of the note.
File Name	dummyfilename	String	Dummy attribute associated with the note attachment
Modified On	modifiedon	DateTime	Date and time when the note was last modified.
Language ID	langid	String	Language identifier for the note.
Owner	ownerid	Owner	Unique identifier of the user or team who owns the note.
Created On	createdon	DateTime	Date and time when the note was created.
Document	documentbody	String	Contents of the note's attachment.
Is Document	isdocument	Boolean	Specifies whether the note is an attachment.

Display Name	Logical Name	Datatype	Description
Modified By (Delegate)	modifiedonbehalfby	Lookup	Unique identifier of the delegate user who last modified the annotation.
Object Type	objecttypecode	EntityName	Type of entity with which the note is associated.
Record Created On	overriddencreatedon	DateTime	Date and time that the record was migrated.
Note	annotationid	Uniqueidentifier	Unique identifier of the note.

Bookable Resource Booking

Represents the line details of a resource booking.

Setting	Value
Collection Name	Bookable Resource Bookings
Logical Name	bookableresourcebooking
Primary attribute name	bookableresourcebookingid
Object Type Code	1145
Is custom table	No

Attributes

Display Name	Logical Name	Datatype	Description
Base Travel Duration	msdyn_basetravelduration	Integer	The Base travel duration indicates the travel time without traffic
Booking Setup Metadata	msdyn_bookingsetupmetadataid	Lookup	A unique identifier for the booking setup metadata that is associated with a bookable resource booking.
Version Number	versionnumber	BigInt	Version Number
Created On	createdon	DateTime	Date and time when the record was created.
Header	header	Lookup	Shows the reference to the booking header record that represents the summary of bookings.
(Deprecated) Traversed Path	traversedpath	String	A comma separated list of string values representing the unique identifiers of stages in a Business Process Flow Instance in the order that they occur.
Modified On	modifiedon	DateTime	Date and time when the record was modified.
Created By (Delegate)	createdonbehalfby	Lookup	Unique identifier of the delegate user who created the record.
End Time	endtime	DateTime	Enter the end date and time of the booking.
Booking Method	msdyn_bookingmethod	Picklist	Shows the method used to create this booking.
Record Created On (Deprecated)	overriddencreatedon	DateTime	Date and time that the record was migrated.
Stage Id	stageid	Uniqueidentifier	Contains the id of the stage where the entity is located.
Cascade Crew Changes	msdyn_cascadecrewchanges	Boolean	Defines whether changing any of the following fields (Start Time, End Time, Status) should cascade the changes to other bookings on this requirement that have the same start and end time.
Modified By (Delegate)	modifiedonbehalfby	Lookup	Unique identifier of the delegate user who modified the record.
Booking Status	bookingstatus	Lookup	Select the status of the booking.
Owning Team	owningteam	Lookup	Unique identifier for the team that owns the record.

Display Name	Logical Name	Datatype	Description
Miles Traveled	msdyn_milestraveled	Double	In this field you can enter the total miles the resource drove to the job site
Status	statecode	State	Status of the Bookable Resource Booking
Time Zone Rule Version Number	timezoneruleversionnumber	Integer	For internal use only.
Appointment Booking	msdyn_appointmentbookingid	Lookup	Unique identifier for Appointment associated with Bookable Resource Booking.
ExchangeRate	exchangerate	Decimal	Exchange rate for the currency associated with the bookableresourcebooking with respect to the base currency.
Requirement Group Set	msdyn_requirementgroupset	String	Requirement Group Set
Resource	resource	Lookup	Shows the resource that is booked.
Bookable Resource Booking	bookableresourcebookingid	Uniqueidentifier	Unique identifier of the resource booking.
Estimated Arrival Time	msdyn_estimatedarrivaltime	DateTime	Estimated Arrival Time
Capacity	msdyn_effort	Decimal	Capacity that needs to take from resource capacity
UTC Conversion Time Zone Code	utcconversiontimezonecode	Integer	Time zone code that was in use when the record was created.
Accept Cascade Crew Changes	msdyn_acceptcascadecrewchanges	Boolean	Defines whether this booking accepts changes propagated as cascading changes
Owner	ownerid	Owner	Owner Id
Start Time	starttime	DateTime	Enter the start date and time of the booking.
Import Sequence Number	importsequencenumber	Integer	Sequence number of the import that created this record.
Duration	duration	Integer	Enter the duration of the booking.
Resource Requirement	msdyn_resourcerequirement	Lookup	Resource Requirement
Requirement Group	msdyn_requirementgroupid	Lookup	Requirement Group
Process Id	processid	Uniqueidentifier	Contains the id of the process associated with the entity.
Estimated Travel Duration	msdyn_estimatedtravelduration	Integer	Estimated Travel Duration
Actual Arrival Time	msdyn_actualarrivaltime	DateTime	Shows the time that work started.
Actual Travel Duration	msdyn_actualtravelduration	Integer	Shows the total travel duration. Calculated based on the difference between the Bookable Resource Booking's start time and actual arrival time.

Display Name	Logical Name	Datatype	Description
Currency	transactioncurrencyid	Lookup	Exchange rate for the currency associated with the BookableResourceBooking with respect to the base currency.
Created By	createdby	Lookup	Unique identifier of the user who created the record.
Modified By	modifiedby	Lookup	Unique identifier of the user who modified the record.
Travel Time Calculation	msdyn_traveltimecalculationtype	Picklist	Travel Time Calculation
Booking Typebookingtype		Picklist	Select whether the booking is solid or liquid. Solid bookings are firm and cannot be changed whereas liquid bookings can be changed.
Internal Flags msdyn_ursinternalflags		Memo	For internal use only.
Owning User owninguser		Lookup	Unique identifier for the user that owns the record.
Work Location	msdyn_worklocation	Picklist	
Owning Business Unit	owningbusinessunit	Lookup	Unique identifier for the business unit that owns the record
Latitude	msdyn_latitude	Double	
Name	name	String	Type a name for the booking.
Status Reason	statuscode	Status	Reason for the status of the Bookable Resource Booking
Longitude	msdyn_longitude	Double	
Allow Overlapping	msdyn_allowoverlapping	Boolean	Allow the time of this booking to be displayed on the schedule assistant as available.
Time Group Detail Selected	msdyn_timegroupdetailselected	Lookup	
Resource Group	msdyn_resourcegroup	Lookup	Unique identifier for Resource associated with Resource Booking
Service Activity	msdyn_serviceappointment	Lookup	Unique identifier for Service Appointment associated with Resource Booking.

Connection

Relationship between two entities.

Setting	Value
Collection Name	Connections
Logical Name	connection
Primary attribute	nameconnectionid
Object Type Code	3234
Is custom table	No

Attributes

Display Name	Logical Name	Datatype	Description
Modified By (Delegate)	modifiedonbehalfby	Lookup	Shows who last updated the record on behalf of another user.
Type (From)	record1objecttypecode	Picklist	Shows the record type of the source record.
Type (To)	record2objecttypecode	Picklist	Shows the record type of the target record.
Ending	effectiveend	DateTime	Enter the end date of the connection.
Currency	transactioncurrencyid	Lookup	Choose the local currency for the record to make sure budgets are reported in the correct currency.
Entity Image	entityimage	Virtual	The default image for the entity.
Owning User	owninguser	Lookup	Unique identifier of the user who owns the connection.
Name (To)	record2idname	String	Display name for the target record.
Entity Image Id	entityimageid	Uniqueidentifier	For internal use only.
Starting	effectivestart	DateTime	Enter the start date of the connection.
Import Sequence Number	importsequencenumber	Integer	Unique identifier of the data import or data migration that created this record.
Created By (Delegate)	createdonbehalfby	Lookup	Shows who created the record on behalf of another user.
Connection Name	name	String	Name of the connection.
Name (From)	record1idname	String	Display name for the source record.
Status Reason	statuscode	Status	Reason for the status of the connection.
Owning Business Unit	owningbusinessunit	Lookup	Shows the business unit that the record owner belongs to.
Version Number	versionnumber	BigInt	Version number of the connection.
Modified By	modifiedby	Lookup	Shows who last updated the record.
Created By	createdby	Lookup	Shows who created the record.

Display Name	Logical Name	Datatype	Description
Owning Team	owningteam	Lookup	Unique identifier of the team who owns the connection.
Owner	ownerid	Owner	Enter the user or team who is assigned to manage the record. This field is updated every time the record is assigned to a different user.
Role (To)	record2roleid	Lookup	Choose the secondary party's role or relationship with the primary party.
Modified On	modifiedon	DateTime	Shows the date and time when the record was last updated. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
Exchange Rate	exchangerate	Decimal	Shows the conversion rate of the record's currency. The exchange rate is used to convert all money fields in the record from the local currency to the system's default currency.
Connected To	record2id	Lookup	Unique identifier of the target record.
Status	statecode	State	Shows whether the connection is active or inactive. Inactive connections are read-only and can't be edited unless they are reactivated.
Is Master	ismaster	Boolean	Indicates that this is the master record.
Created On	createdon	DateTime	Shows the date and time when the record was created. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
Role (From)	record1roleid	Lookup	Choose the primary party's role or relationship with the second party.
Description	description	Memo	Type additional information to describe the connection, such as the length or quality of the relationship.
Connected From	record1id	Lookup	Unique identifier of the source record.
Connection	connectionid	Uniqueidentifier	Unique identifier of the connection.
Reciprocal Connection	relatedconnectionid	Lookup	Unique identifier for the reciprocal connection record.
Record Created On	overriddencreatedon	DateTime	Date and time that the record was migrated.

Contact

Person with whom a business unit has a relationship, such as customer, supplier, and colleague.

Setting	Value
Collection Name	Contacts
Logical Name	contact
Primary attribute name	contactid
Object Type Code	2
Is custom table	No

Attributes

Display Name	Logical Name	Datatype	Description
Address 1: County	address1_county	String	Type the county for the primary address.
Yomi Last Name	yomilastname	String	Type the phonetic spelling of the contact's last name, if the name is specified in Japanese, to make sure the name is pronounced correctly in phone calls with the contact.
Address 3: UTC Offset	address3_utcoffset	Integer	Select the time zone, or UTC offset, for this address so that other people can reference it when they contact someone at this address.
Description	description	Memo	Type additional information to describe the contact, such as an excerpt from the company's website.
Department	department	String	Type the department or business unit where the contact works in the parent company or business.
Has Children	haschildrencode	Picklist	Select whether the contact has any children for reference in follow-up phone calls and other communications.
Address 1: ID	address1_addressid	Uniqueidentifier	Unique identifier for address 1.
Back Office Customer	isbackofficecustomer	Boolean	Select whether the contact exists in a separate accounting or other system, such as Microsoft Dynamics GP or another ERP database, for use in integration processes.
Import Sequence Number	importsequencenumber	Integer	Unique identifier of the data import or data migration that created this record.
Profile Is Anonymous	adx_profileisanonymous	Boolean	
Access Failed Count	adx_identity_accessfailedcount	Integer	Shows the current count of failed password attempts for the contact.
Manager	managername	String	Type the name of the contact's manager for use in escalating issues or other follow-up communications with the contact.
Profile Last Activity	adx_profilelastactivity	DateTime	
Entity Image Id	entityimageid	Uniqueidentifier	For internal use only.
Home Phone	telephone2	String	Type a second phone number for this contact.
Parent Customer Type	parentcustomeridtype	EntityName	
Address 2: UPS Zone	address2_upszone	String	Type the UPS zone of the secondary address to make sure shipping charges are calculated correctly and deliveries are made promptly, if shipped by UPS.
Relationship Type	customertypecode	Picklist	Select the category that best describes the relationship between the contact and your organization.
Address 1: UPS Zone	address1_upszone	String	Type the UPS zone of the primary address to make sure shipping charges are calculated correctly and deliveries are made promptly, if shipped by UPS.
Address 1: Freight Terms	address1_freighttermscode	Picklist	Select the freight terms for the primary address to make sure shipping orders are processed correctly.
Do not allow Bulk Mails	donotbulkpostalmail	Boolean	Select whether the contact accepts bulk postal mail sent through marketing campaigns or quick campaigns. If Do Not Allow is selected, the contact can be added to marketing lists, but will be excluded from the letters.

Display Name	Logical Name	Datatype	Description
Gender	gendercode	Picklist	Select the contact's gender to make sure the contact is addressed correctly in sales calls, email, and marketing campaigns.
Do not allow Mails	donotpostalmail	Boolean	Select whether the contact allows direct mail. If Do Not Allow is selected, the contact will be excluded from letter activities distributed in marketing campaigns.
Last On Hold Time	lastonholdtime	DateTime	Contains the date and time stamp of the last on hold time.
Address 1: Address Type	address1_addresstypecode	Picklist	Select the primary address type.
Address 1: Phone	address1_telephone1	String	Type the main phone number associated with the primary address.
Address 1: Telephone 2	address1_telephone2	String	Type a second phone number associated with the primary address.
Address 1: Telephone 3	address1_telephone3	String	Type a third phone number associated with the primary address.
Address 1: Fax	address1_fax	String	Type the fax number associated with the primary address.
Address 3: Telephone1	address3_telephone1	String	Type the main phone number associated with the third address.
Address 3: Telephone2	address3_telephone2	String	Type a second phone number associated with the third address.
Address 3: Telephone3	address3_telephone3	String	Type a third phone number associated with the primary address.
Fax	fax	String	Type the fax number for the contact.
Assistant	assistantname	String	Type the name of the contact's assistant.
Address 2: Street 3	address2_line3	String	Type the third line of the secondary address.
Mobile Phone	mobilephone	String	Type the mobile phone number for the contact.
Owning Business Unit	owningbusinessunit	Lookup	Unique identifier of the business unit that owns the contact.
Full Name	fullname	String	Combines and shows the contact's first and last names so that the full name can be displayed in views and reports.
Address 2: Longitude	address2_longitude	Double	Type the longitude value for the secondary address for use in mapping and other applications.
Subscription	subscriptionid	Uniqueidentifier	For internal use only.
GDPR Optout	msdyn_gdproptout	Boolean	Describes whether contact is opted out or not
Version Number	versionnumber	BigInt	Version number of the contact.
Address 1: Latitude	address1_latitude	Double	Type the latitude value for the primary address for use in mapping and other applications.
Aging 30	aging30	Money	For system use only.
Security Stamp	adx_identity_securitystamp	String	A token used to manage the web authentication session.
Last Date Included in Campaign	lastusedincampaign	DateTime	Shows the date when the contact was last included in a marketing campaign or quick campaign.
User Name	adx_identity_username	String	Shows the user identity for local web authentication.
Address 3: Fax	address3_fax	String	Type the fax number associated with the third address.
Address 2: Telephone 1	address2_telephone1	String	Type the main phone number associated with the secondary address.
Preferred Time	preferredappointmenttimecode	Picklist	Select the preferred time of day for service appointments.
Credit Limit (Base)	creditlimit_base	Money	Shows the Credit Limit field converted to the system's default base currency for reporting purposes. The calculations use the exchange rate specified in the Currencies area.
Preferred Service	preferredserviceid	Lookup	Choose the contact's preferred service to make sure services are scheduled correctly for the customer.
Pager	pager	String	Type the pager number for the contact.
Salutation	salutation	String	Type the salutation of the contact to make sure the contact is addressed correctly in sales calls, email messages, and marketing campaigns.

Display Name	Logical Name	Datatype	Description
Address 2: City	address2_city	String	Type the city for the secondary address.
Address3: ZIP/Postal Code	address3_postalcode	String	the ZIP Code or postal code for the 3rd address.
Address 2: Street 2	address2_line2	String	Type the second line of the secondary address.
Aging 60	aging60	Money	For system use only.
Organization Name	adx_organizationname	String	
Mobile Phone Confirmed	adx_identity_mobilephoneconfirmed	Boolean	Determines if the phone number is confirmed by the contact.
Portal Terms Agreement Date	msdyn_portaltermsagreementdate	DateTime	Indicates the date and time that the person agreed to the portal terms and conditions.
Aging 90	aging90	Money	For system use only.
Created By (External Party)	createdbyexternalparty	Lookup	Shows the external party who created the record.
Address 3: UPS Zone	address3_upszone	String	Type the UPS zone of the third address to make sure shipping charges are calculated correctly and deliveries are made promptly, if shipped by UPS.
Address 3: County	address3_county	String	Type the county for the third address.
Government	governmentid	String	Type the passport number or other government ID for the contact for use in documents or reports.
Callback Number	callback	String	Type a callback phone number for this contact.
Credit Hold	creditonhold	Boolean	Select whether the contact is on a credit hold, for reference when addressing invoice and accounting issues.
Address 2: Freight Terms	address2_freighttermscode	Picklist	Select the freight terms for the secondary address to make sure shipping orders are processed correctly.
Business Phone 2	business2	String	Type a second business phone number for this contact.
Modified By (Delegate)	modifiedonbehalfby	Lookup	Shows who last updated the record on behalf of another user.
Currency	transactioncurrencyid	Lookup	Choose the local currency for the record to make sure budgets are reported in the correct currency.
Not at Company Flag	msdyn_orgchangestatus	Picklist	Whether or not the contact belongs to the associated account
Yomi Full Name	yomifullname	String	Shows the combined Yomi first and last names of the contact so that the full phonetic name can be displayed in views and reports.
Address 2: Telephone 2	address2_telephone2	String	Type a second phone number associated with the secondary address.
Payment Terms	paymenttermscode	Picklist	Select the payment terms to indicate when the customer needs to pay the total amount.
Address 2: ZIP/Postal Code	address2_postalcode	String	Type the ZIP Code or postal code for the secondary address.
Birthday	birthdate	DateTime	Enter the contact's birthday for use in customer gift programs or other communications.
Address3: Street 3	address3_line3	String	the third line of the 3rd address.
Spouse/Partner Name	spousesname	String	Type the name of the contact's spouse or partner for reference during calls, events, or other communications with the contact.
Address 1: UTC Offset	address1_utcoffset	Integer	Select the time zone, or UTC offset, for this address so that other people can reference it when they contact someone at this address.
Yomi Middle Name	yomimiddlename	String	Type the phonetic spelling of the contact's middle name, if the name is specified in Japanese, to make sure the name is pronounced correctly in phone calls with the contact.
(Deprecated) Traversed Path	traversedpath	String	For internal use only.
Exchange Rate	exchangerate	Decimal	Shows the conversion rate of the record's currency. The exchange rate is used to convert all money fields in the record from the local currency to the system's default currency.
Time Zone	adx_timezone	Integer	

Display Name	Logical Name	Datatype	Description
Modified By (External Party)	modifiedbyexternalparty	Lookup	Shows the external party who modified the record.
Address 1: Street 3	address1_line3	String	Type the third line of the primary address.
Last Successful Login	adx_identity_lastsuccessfullogin	DateTime	Indicates the last date and time the user successfully signed in to a portal.
Address3: Country/Region	address3_country	String	the country or region for the 3rd address.
Disable Web Tracking	msdyn_disablewebtracking	Boolean	Indicates that the contact has opted out of web tracking.
Address 2: Street 1	address2_line1	String	Type the first line of the secondary address.
Role	accountrolecode	Picklist	Select the contact's role within the company or sales process, such as decision maker, employee, or influencer.
Middle Name	middlename	String	Type the contact's middle name or initial to make sure the contact is addressed correctly.
Manager Phone	managerphone	String	Type the phone number for the contact's manager.
Address 2: State/Province	address2_stateorprovince	String	Type the state or province of the secondary address.
Company Name	parentcustomerid	Customer	Select the parent account or parent contact for the contact to provide a quick link to additional details, such as financial information, activities, and opportunities.
Address 2: Name	address2_name	String	Type a descriptive name for the secondary address, such as Corporate Headquarters.
Address 3: ID	address3_addressid	Uniqueidentifier	Unique identifier for address 3.
Address3: State/Province	address3_stateorprovince	String	the state or province of the third address.
Login Enabled	adx_identity_logonenabled	Boolean	Determines if web authentication is enabled for the contact.
Entity Image	entityimage	Virtual	Shows the default image for the record.
Address3: Street 1	address3_line1	String	the first line of the 3rd address.
Created By IP Address	adx_createdbyipaddress	String	
BusinessCardAttributes	businesscardattributes	String	Stores Business Card Control Properties.
Anniversary	anniversary	DateTime	Enter the date of the contact's wedding or service anniversary for use in customer gift programs or other communications.
Territory	territorycode	Picklist	Select a region or territory for the contact for use in segmentation and analysis.
Send Marketing Materials	donotsendmm	Boolean	Select whether the contact accepts marketing materials, such as brochures or catalogs. Contacts that opt out can be excluded from marketing initiatives.
Do not allow Bulk Emails	donotbulkemail	Boolean	Select whether the contact accepts bulk email sent through marketing campaigns or quick campaigns. If Do Not Allow is selected, the contact can be added to marketing lists, but will be excluded from the email.
Address 1: Primary Contact Name	address1_primarycontactname	String	Type the name of the main contact at the account's primary address.
Preferred User	preferredsystemuserid	Lookup	Choose the regular or preferred customer service representative for reference when scheduling service activities for the contact.
Profile Modified On	adx_profilemodifiedon	DateTime	
Address 2: UTC Offset	address2_utcoffset	Integer	Select the time zone, or UTC offset, for this address so that other people can reference it when they contact someone at this address.
Home Phone 2	home2	String	Type a second home phone number for this contact.
Address Name	address1_name	String	Type a descriptive name for the primary address, such as Corporate Headquarters.
Children's Names	childrensnames	String	Type the names of the contact's children for reference in communications and client programs.
Address 2: Telephone 3	address2_telephone3	String	Type a third phone number associated with the secondary address.

Display Name	Logical Name	Datatype	Description
Address 3: Primary Contact Name	address3_primarycontactname	String	Type the name of the main contact at the account's third address.
FTP Site	ftpsiteurl	String	Type the URL for the contact's FTP site to enable users to access data and share documents.
Address 1: ZIP/Postal Code	address1_postalcode	String	Type the ZIP Code or postal code for the primary address.
Two Factor Enabled	adx_identity_twofactorenabled	Boolean	Determines if two-factor authentication is enabled for the contact.
Address 3: Freight Terms	address3_freighttermscode	Picklist	Select the freight terms for the third address to make sure shipping orders are processed correctly.
Created On	createdon	DateTime	Shows the date and time when the record was created. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
SLA	slaid	Lookup	Choose the service level agreement (SLA) that you want to apply to the Contact record.
Originating Lead	originatingleadid	Lookup	Shows the lead that the contact was created if the contact was created by converting a lead in Microsoft Dynamics 365. This is used to relate the contact to the data on the originating lead for use in reporting and analytics.
Address 1: State/Province	address1_stateorprovince	String	Type the state or province of the primary address.
Follow Email Activity	followemail	Boolean	Information about whether to allow following email activity like opens, attachment views and link clicks for emails sent to the contact.
Aging 90 (Base)	aging90_base	Money	Shows the Aging 90 field converted to the system's default base currency. The calculations use the exchange rate specified in the Currencies area.
Job Title	jobtitle	String	Type the job title of the contact to make sure the contact is addressed correctly in sales calls, email, and marketing campaigns.
Telephone 3	telephone3	String	Type a third phone number for this contact.
Annual Income (Base)	annualincome_base	Money	Shows the Annual Income field converted to the system's default base currency. The calculations use the exchange rate specified in the Currencies area.
Price List	defaultpricelevelid	Lookup	Choose the default price list associated with the contact to make sure the correct product prices for this customer are applied in sales opportunities, quotes, and orders.
Address 1: Shipping Method	address1_shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Address 1: Longitude	address1_longitude	Double	Type the longitude value for the primary address for use in mapping and other applications.
Preferred Day	preferredappointmentdaycode	Picklist	Select the preferred day of the week for service appointments.
Aging 60 (Base)	aging60_base	Money	Shows the Aging 60 field converted to the system's default base currency. The calculations use the exchange rate specified in the Currencies area.
Address 2: Fax	address2_fax	String	Type the fax number associated with the secondary address.
New Password Input	adx_identity_newpassword	String	
Customer Size	customersizecode	Picklist	Select the size of the contact's company for segmentation and reporting purposes.
Status	statecode	State	Shows whether the contact is active or inactive. Inactive contacts are read-only and can't be edited unless they are reactivated.
Annual Income	annualincome	Money	Type the contact's annual income for use in profiling and financial analysis.
Status Reason	statuscode	Status	Select the contact's status.
Profile Alert Instructions	adx_profilealertinstructions	Memo	

Display Name	Logical Name	Datatype	Description
Employee	employeeid	String	Type the employee ID or number for the contact for reference in orders, service cases, or other communications with the contact's organization.
UPRN	address1_postofficebox	String	Type the post office box number of the primary address.
Address 1: City	address1_city	String	Type the city for the primary address.
TeamsFollowed	teamsfollowed	Integer	Number of users or conversations followed the record
Credit Limit	creditlimit	Money	Type the credit limit of the contact for reference when you address invoice and accounting issues with the customer.
Time Zone Rule Version Number	timezoneruleversionnumber	Integer	For internal use only.
Owning User	owninguser	Lookup	Unique identifier of the user who owns the contact.
Preferred Method of Contact	preferredcontactmethodcode	Picklist	Select the preferred method of contact.
Lead Source	leadsourcecode	Picklist	Select the primary marketing source that directed the contact to your organization.
Address3: Street 2	address3_line2	String	the second line of the 3rd address.
Last SLA applied	slainvokedid	Lookup	Last SLA that was applied to this case. This field is for internal use only.
Preferred Facility/Equipment	preferredequipmentid	Lookup	Choose the contact's preferred service facility or equipment to make sure services are scheduled correctly for the customer.
Public Profile Copy	adx_publicprofilecopy	Memo	
Participates in Workflow	participatesinworkflow	Boolean	Shows whether the contact participates in workflow rules.
Lockout End Date	adx_identity_lockoutenddate	DateTime	Shows the moment in time when the locked contact becomes unlocked again.
Modified By IP Address	adx_modifiedbyipaddress	String	
Address 2: Post Office Box	address2_postofficebox	String	Type the post office box number of the secondary address.
Is Minor with Parental Consent	msdyn_isminorwithparentalconsent	Boolean	Indicates that the contact is considered a minor in their jurisdiction and has parental consent.
Email Address 3	emailaddress3	String	Type an alternate email address for the contact.
Email Address 2	emailaddress2	String	Type the secondary email address for the contact.
Email	emailaddress1	String	Type the primary email address for the contact.
Created By Username	adx_createdbyusername	String	
Website	websiteurl	String	Type the contact's professional or personal website or blog URL.
Nickname	nickname	String	Type the contact's nickname.
Address 3: Name	address3_name	String	Type a descriptive name for the third address, such as Corporate Headquarters.
Last Name	lastname	String	Type the contact's last name to make sure the contact is addressed correctly in sales calls, email, and marketing campaigns.
Address 3: Longitude	address3_longitude	Double	Type the longitude value for the third address for use in mapping and other applications.
Merged	merged	Boolean	Shows whether the account has been merged with a master contact.
On Hold Time (Minutes)	onholdtime	Integer	Shows how long, in minutes, that the record was on hold.
Marketing Only	marketingonly	Boolean	Whether is only for marketing
Address 3: Shipping Method	address3_shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Owner	ownerid	Owner	Enter the user or team who is assigned to manage the record. This field is updated every time the record is assigned to a different user.
Business Phone	telephone1	String	Type the main phone number for this contact.
Address 2: Address Type	address2_addresstypecode	Picklist	Select the secondary address type.

Display Name	Logical Name	Datatype	Description
Password Hash	adx_identity_passwordhash	String	
Address 3: Post Office Box	address3_postofficebox	String	the post office box number of the 3rd address.
Modified By Username	adx_modifiedbyusername	String	
Assistant Phone	assistantphone	String	Type the phone number for the contact's assistant.
Address 2: ID	address2_addressid	Uniqueidentifier	Unique identifier for address 2.
Address 1	address1_composite	Memo	Shows the complete primary address.
Do not allow Faxes	donotfax	Boolean	Select whether the contact allows faxes. If Do Not Allow is selected, the contact will be excluded from any fax activities distributed in marketing campaigns.
Profile Alert	adx_profilealert	Boolean	
Preferred Language	adx_preferredlanguageid	Lookup	User's preferred portal language
Is Minor	msdyn_isminor	Boolean	Indicates that the contact is considered a minor in their jurisdiction.
Address 2: Shipping Method	address2_shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Address 2: Country/Region	address2_country	String	Type the country or region for the secondary address.
Profile Alert Date	adx_profilealertdate	DateTime	
Address 1: Street 1	address1_line1	String	Type the first line of the primary address.
Yomi First Name	yomifirstname	String	Type the phonetic spelling of the contact's first name, if the name is specified in Japanese, to make sure the name is pronounced correctly in phone calls with the contact.
Address 3: City	address3_city	String	Type the city for the 3rd address.
Address 1: Country/Region	address1_country	String	Type the country or region for the primary address.
External User Identifier	externaluseridentifier	String	Identifier for an external user.
First Name	firstname	String	Type the contact's first name to make sure the contact is addressed correctly in sales calls, email, and marketing campaigns.
(Deprecated) Process Stage	stageid	Uniqueidentifier	Shows the ID of the stage.
Modified By	modifiedby	Lookup	Shows who last updated the record.
Local Login Disabled	adx_identity_locallogindisabled	Boolean	Indicates that the contact can no longer sign in to the portal using the local account.
Do not allow Phone Calls	donotphone	Boolean	Select whether the contact accepts phone calls. If Do Not Allow is selected, the contact will be excluded from any phone call activities distributed in marketing campaigns.
Suffix	suffix	String	Type the suffix used in the contact's name, such as Jr. or Sr. to make sure the contact is addressed correctly in sales calls, email, and marketing campaigns.
Master ID	masterid	Lookup	Unique identifier of the master contact for merge.
Parent Contact	parentcontactid	Lookup	Unique identifier of the parent contact.
Time Spent by me	timespentbymeonemailandmeetings	String	Total time spent for emails (read and write) and meetings by me in relation to the contact record.
Address 2: Latitude	address2_latitude	Double	Type the latitude value for the secondary address for use in mapping and other applications.
Address 3	address3_composite	Memo	Shows the complete third address.
Record Created On	overriddencreatedon	DateTime	Date and time that the record was migrated.
Address 3: Address Type	address3_addresstypecode	Picklist	Select the third address type.
Aging 30 (Base)	aging30_base	Money	Shows the Aging 30 field converted to the system's default base currency. The calculations use the exchange rate specified in the Currencies area.
Marital Status	familystatuscode	Picklist	Select the marital status of the contact for reference in follow-up phone calls and other communications.
UTC Conversion Time Zone Code	utcconversiontimezonecode	Integer	Time zone code that was in use when the record was created.
Address 2: County	address2_county	String	Type the county for the secondary address.
Contact	contactid	Uniqueidentifier	Unique identifier of the contact.

Display Name	Logical Name	Datatype	Description
Address 2: Primary Contact Name	address2_primarycontactname	String	Type the name of the main contact at the account's secondary address.
Shipping Method	shippingmethodcode	Picklist	Select a shipping method for deliveries sent to this address.
Owning Team	owningteam	Lookup	Unique identifier of the team who owns the contact.
Address 1: Street 2	address1_line2	String	Type the second line of the primary address.
Auto-created	isautocreate	Boolean	Information about whether the contact was auto-created when promoting an email or an appointment.
Managing Partner	msa_managingpartnerid	Lookup	Unique identifier for Account associated with Contact.
Do not allow Emails	donotemail	Boolean	Select whether the contact allows direct email sent from Microsoft Dynamics 365. If Do Not Allow is selected, Microsoft Dynamics 365 will not send the email.
Process	processid	Uniqueidentifier	Shows the ID of the process.
Education	educationcode	Picklist	Select the contact's highest level of education for use in segmentation and analysis.
Modified On	modifiedon	DateTime	Shows the date and time when the record was last updated. The date and time are displayed in the time zone selected in Microsoft Dynamics 365 options.
Account	accountid	Lookup	Unique identifier of the account with which the contact is associated.
Business Card	businesscard	Memo	Stores Image of the Business Card
Company Phone	company	String	Type the company phone of the contact.
Created By (Delegate)	createdonbehalfby	Lookup	Shows who created the record on behalf of another user.
Confirm Remove Password	adx_confirmremovepassword	Boolean	
Address 2	address2_composite	Memo	Shows the complete secondary address.
Created By	createdby	Lookup	Shows who created the record.
Lockout Enabled	adx_identity_lockoutenabled	Boolean	Determines if this contact will track failed access attempts and become locked after too many failed attempts. To prevent the contact from becoming locked, you can disable this setting.
No. of Children	numberofchildren	Integer	Type the number of children the contact has for reference in follow-up phone calls and other communications.
Address 3: Latitude	address3_latitude	Double	Type the latitude value for the third address for use in mapping and other applications.
Email Confirmed	adx_identity_emailaddress1confirmed	Boolean	Determines if the email is confirmed by the contact.

DocFX templates

These are the currently available templates included in this project to extend the functionality and styling of the default template.

All templates include both web and pdf versions.

base

This template is used by all other templates.

The base template provides all the page templates and functionality, which are then styled by the other templates.

web

DocFX template with styling matching my Cloud Awesome blog.

web-dark

A dark themed version of the standard light version above

gds

DocFX template consuming the gov.uk frontend design system to extend the above base functionality.

gds-dark

A (totally unofficial!) dark themed version of the above GDS design

A YAML-generated landing page!!

Learn how to use App Service Web Apps to build and host websites and web applications.

.NET

Learn some .NET stuff here

Node.js

Go all modern and learn Node. It's like Javascript but better.

PHP

Learn PHP here. Yes, OK, it's old but it works :)

Java

Learn some Java and go old school

Python

Quick tips on Python. If you really have to.

HTML

Study good old HTML. You know you love it!

5-Minute Quickstarts

- .NET
- Node.js
- PHP
- Java
- Python
- HTML

Step-by-Step Tutorials

- Create an application using .NET with Azure SQL DB or Node.js with MongoDB

- Map an existing custom domain to your application

- Bind an existing SSL certificate to your application

A YAML-generated decisions list

These decisions were made... Click on each one for more details.

The links currently take a relative URL, instead of an xref - I think I probably prefer the latter

This is some more content for the main body of the page...

Decision	Status	Owner
1. This is a decision	Approved	Arthur
2. This is a decision	**Needs approval**	Dawid
3. This is a decision	Approved	Arthur
4. This is a decision	Approved	Mike
5. This is a decision	~~Rejected~~	Laura
6. This is a decision	Approved	Dawid
7. This is a decision	Approved	Arthur

Definition of done

This is a deifnition of done for User Stories only. The DoD can be extended for Tasks/Features/Epics if deemed appropriate

The DoD is a living document and if any points are deemed to be counter-productive or if additional points are found to be useful during build

It is owned by the whole team and contributions are encouraged from any team member

Build

1. Functionality meets acceptance criteria

- Check all scenarios
- Be able to demo each one

2. Unit tests are running green

Unit tests and/or integration tests depending on software type
- Target coverage is 80%
- Any refactoring required is complete

QA

1. All bugs raised are closed

- Any bugs remaining open are accepted by the PO as technical debt and can remain in the backlog

2. Functionality approved by tester

3. Release notes generated and published

4. Deployed to UAT...
